# **INTEGRAL SERVICES COMPANY W. L. L.**

**Multidisciplinary Construction and Maintenance**

### **Message from C&MD's Desk**

Since our earliest stages of operation and throughout the past three decades, ISCO has been dedicating to providing high quality services and innovative solutions to the power and hydrocarbon industries in the MENA region and other parts of the world.

Being a major player in a highly sophisticated and challenging field is very critical, and requires full awareness and consistency in developing and improving our capabilities, acquiring technical and managerial know-how, and developing innovative solutions to maintain our position as a reliable resource for our valued clients. To meet these challenges, we have structured our corporation into multi-division levels that allows us to handle projects from the initial designing stage, through execution and commissioning, and up to the after-sales service and maintenance. All these activities are implemented in-house in accordance with ISO international quality, environment and health and safety standards.

We cannot succeed and achieve our goals without our dedicated, professional and skilled team; which works in state-of the art facilities to ensure our deliverables are met on time, whilst also meeting our clients' expectations.

We are proud to have most of the major EPC and consultation companies as our valuable partners and clients. We have traveled together all these miles and faced many challenges, but we have also enjoyed much success together.

We look forward to continuing our collaboration and hope to remain your dependable resource for all your needs.

## **Introduction**

Established and registered in Kuwait since 1976, ISCO is a multi-discipline, professional engineering, manufacturing, and construction company.

With a rich history record, today, ISCO is one of the leading and fast growing companies providing services include engineering, construction, procurement, manufacturing and fabrication, Special Services (NDT, insulation, scaffolding, refractory, blasting & painting, fireproofing, coating & wrapping, diving and marine, chemical cleaning) not withstanding service and maintenance. Our services have earned an outstanding reputation within the following industries:

- Oil and Gas production
- Petroleum refineries
- Gas processing
- Petrochemical
- Power and desalination
- Manufacturing.

With over 3500 employees, advanced resources, and state-of the art facilities located in the heart of the oil zone, ISCO provides innovative, cost effective and total solutions to our valued customers to meet their needs.

### **Vision:**

To become a world class engineering, construction, manufacturing & O&M company in the Gulf region.

### **Mission:**

To provide our customers high quality services, which meet, or exceed their requirements by applying our engineering solution, and well developed processes through our trained and skilled team.

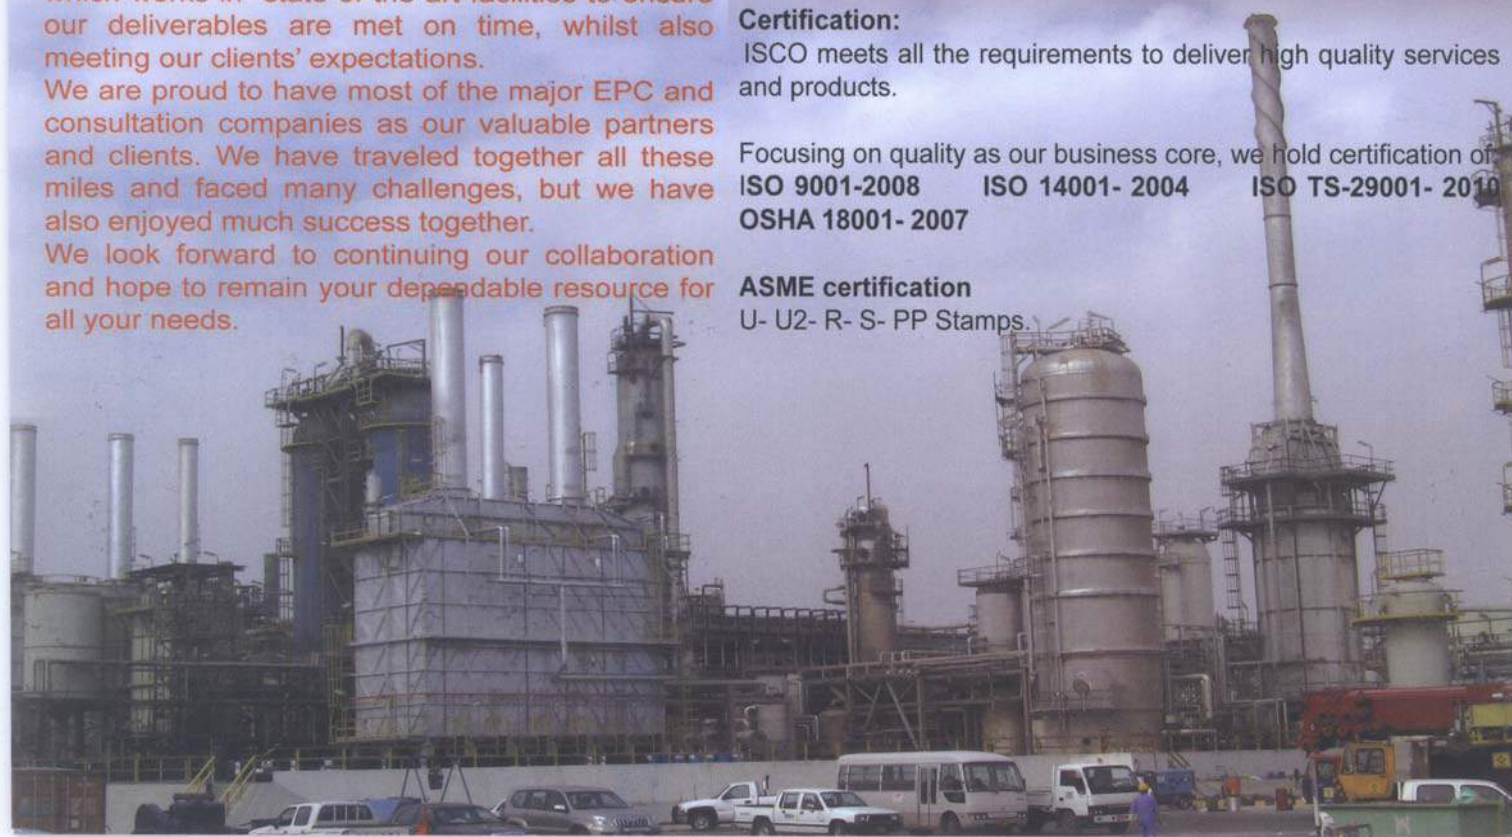

### **Certification:**

ISCO meets all the requirements to deliver high quality services and products.

Focusing on quality as our business core, we hold certification of  
**ISO 9001-2008    ISO 14001- 2004    ISO TS-29001- 2010**  
**OSHA 18001- 2007**

### **ASME certification**

U- U2- R- S- PP Stamps.

### ISCO provides Engineering, Procurement and Construction services in

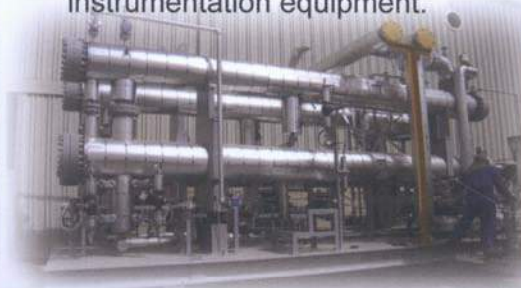

#### Civil and Structural

Designing, Engineering and Construction of buildings, excavations, foundations, tank dykes, pre cast concrete, geographical surveys, consultancy and other types of civil works.

#### Electrical and Instrumentation

Installation of substation transformers and cabling, installation, calibrations & commissioning of DCS, ESD and all other electrical & instrumentation equipment.

#### Mechanical & Piping

Pipe fabrication and installation, structural fabrication and erection, equipment erection and heavy lifts, site fabrication of tanks, start up assistance and commissioning.

#### Heavy Engineering

Holding ASME U,U2,PP, R & S Stamps  
Design and fabrication of:-

- Pressure Vessels
- Skids
- Structural work
- Heat Exchangers
- API Tanks
- Stacks and Chimneys
- Machining
- Cold formed Dish heads
- General Fabrication

#### Maintenance

Mechanical, Electrical & Instrumentation Operation and Maintenance in

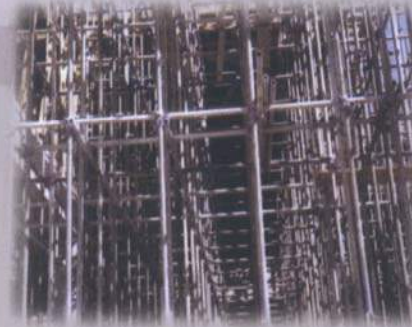

- Refineries.
- Petrochemical Plants.
- Power Plants.
- Distillation Station.
- Process Plants

Assist in supplying skilled manpower.

#### Specialized Services

##### Scaffolding and Access System.

Consultancy, Installation, rental and removal in accordance to BS 1136 for materials and BS 5973 for erection system of all type of access scaffolding.

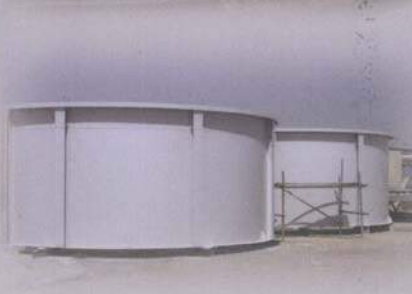

##### Insulation Refractory & Fire Proofing

Supplying and application of Thermal (hot and cold) insulation for boilers, turbines, piping, machinery, ducting, etc. Refractory, fire retardant and fire proofing barriers. Acoustic Insulation.

##### Surface Preparation and painting

Provision of the services for surface preparation by grit blasting, hand or power brushing and needle gunning, painting or coating application using air spray, airless spray, brush or roller application. ISCO's services are provided by well trained and safety oriented professional crew.

#### NDT- QA/QC

##### Non Destructive Testing

All types of NDT services (radiography, ultrasonic testing, magnetic particle testing, penetrant testing, visual inspection, hardness testing, calibration and training of personnel up to ASNT level II) along with quality assurance and control.

#### Industrial Cleaning & Marine Services.

##### Industrial Cleaning

Mechanical, Chemical, High and Ultra high pressure water jetting, steam blowing.

##### Diving and Marine

Diving & Marine services covering underwater inspection, installation and repairs.

ISCO has a fully equipped state of the art manufacturing facility with a covered fabrication yard of 20000 sq. meters and a open yard of 65000 sq. meters to manufacture pressure vessels, heat exchangers, skids, flare stacks, platforms and ladders, structural work and tanks.

The shop has its own rolling machine, auto dish end machine for cold forming of the heads, CNC tube-to-tube sheet drilling machine, VTL, CNC profile cutting machine, SAW welding machine, semi automatic pipe spool fabrication, and PWHT furnace.

### Equipment and Machinery

ISCO acquires the most advanced machinery and equipment, to handle any type of project from the initial stages up to the commissioning of the project.

We consider our location in the midst of three refinery areas, and our in- house assets as an advantage for easy access to the projects' sites. The availability of abundant machines and equipment, makes ISCO a reliable, time oriented, and accountable source for our valuable stakeholders.

- Cranes of various capacities.
- Generators and Compressors of various capacities.
- High pressure and ultra high pressure pumps.
- Insulation instruments.
- Survey instruments.
- NDT equipment and machinery.
- Surface preparation and painting machinery.
- Site offices.

### Office and Camp

The main ISCO office is located at the MA 01 and MA 10 cross-roads, western sector (Mina Abdullah), Shuaiba Industrial Area.

The camps are well managed with a proper care and attention paid to employees related to catering, hygiene and recreation.

### ERP

All ISCO functions are totally integrated by in-house developed ERP package based on the ORACLE platform. Today, all the offices (main office and site offices) are internally connected via LAN, WAN and 3G based network connectivity with a dedicated bandwidth for each site.

# Health, Safety, Security & Environment ( HSSE).

## “ Safety is our first priority”

ISCO is committed to making every HSSE effort in providing safe and healthy working condition, in our bid to leverage our social responsibilities with regards to the environment.

we aim to be the “Contractor of choice”, therefore we have highly trained HSSE personnel available around the clock to develop and maintain HSSE policies at international standards.

We have developed HSSE management system with best practice to meet our stakeholders expectations, in accordance with our effort to perform at the highest level of business excellence.

## HSSE Recognitions.

ISCO is a member of the British Safety council, and the American Society of Safety Engineers in the USA.

We have been awarded many appreciation and recognition certificates from all our customers, Due to our strict and well maintained policies and procedures over the years,

## Key Message.

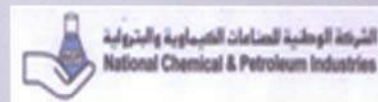

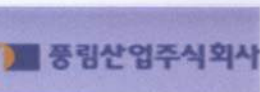

- \* Outstanding track record
- \* Strong customer focus
- \* High Safety and Quality standard
- \* Strong Technical Support
- \* Ownership culture and value
